ISF was founded to supply elevator equipments for use in the modernization of existing elevators and in new elevator design. Our first company has been established in 1973 as Uzay Teknik Co-operation in province of İstanbul. After having experiences nearly 44 years in especially in manufacturing and construction industry, we decided become an entrepreneur, our company name was changed to ISF Elevator and Engineering Company, with Uzay Teknik removed, to make even greater strides as a global company.

Our experiences involve the design elevator systems and supply all components and spare parts for lifts. Our main target is to dedicate our experiences to industry as engineering design and customer support. We set up a marketing team including qualified staffs. Our company, registered officially was ready to meet the demand of the existing lift industry and to contribute to the development of new cities.

We expanded our operations outside Turkey as part of our aim to be a global company. We are sure that we will continue to be appreciated by our customers and look forward to continuing our partnership well into the future. We’re able to meet the diverse needs of the most demanding customers and also have the ability to offer a unique solution to our clients.

Our central aim is to offer flexibility, innovation, and respect to our costumers.
ISF Elevator supplies all types of complete elevator for traction and hydraulic systems that are compatible with machine room and machine roomless systems. Our solutions provide practical solutions that will be suitable for all types of shaft for new or modernization projects. ISF offers an ideal solution for every project and supplies all the components of the elevators.
ISF Elevator supplies all types of elevator controllers that are compatible with MR & MRL systems with parallel or serial connections. Moreover, controllers for two speed and VVVF motors also for hydraulic systems can be supplied by our company.
